EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicants' attorney, Mr. Michael Piper, on 05/15/2006.

Please replace claims 1 and 15 as follows:

1. (Currently Amended) A distributed computing environment, comprising:
 - (a) a server computer platform on which a server process application resides;
 - (b) a plurality of client computer platforms coupled to said server computer platform, each one of said plurality of client computer platforms having a client process application residing thereon;
 - (c) a queue-based messaging system for controlling the exchange of messages between said server process application and said plurality of client process applications, said queue-based messaging system comprising a messaging application residing at each one of said server computer platform and said plurality of client computer platforms, said messaging

Art Unit: 2154

application residing at said server computer platform managing a plurality of queues, each one of said plurality of queues described by a plurality of attributes; and

(d) a system for monitoring said queue-based messaging system, said monitoring system allowing a user to select at least two of said plurality of queues and ~~at least two attributes~~ **four attributes** selected from a group consisting of put, get, trigger and depth attributes, describing one or more of said plurality of queues and generating a display which simultaneously includes a current value for said selected attributes for each one of said selected queues described thereby.

15. (Currently Amended) For a network having a server computer platform and a plurality of client computer platforms coupled to said server platform, a method for monitoring a queue-based messaging system which control the transfer of messages from said plurality of client computer platform to a corresponding plurality of queues residing at said server computer platform, comprising:

(a) selecting at least ~~two~~ **three** attributes including at least one depth attribute and at least ~~one~~ **two** operations control ~~attribute~~ **attributes**, which describe each one of said plurality of queues;

(b) acquiring, from said server computer platform, a value for each one of said at least ~~two~~ **three** attributes; and

(c) generally simultaneously displaying said value for each one of said at least ~~two~~ **three** attributes for all of said plurality of queues.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dustin Nguyen whose telephone number is (571) 272-3971. The examiner can normally be reached on flex schedule.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Follansbee John can be reached on (571) 272-3964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
